The China Arbitration Summit 2025 & China-Latin America International Arbitration Forum, co-hosted by the China International Economic and Trade Arbitration Commission (CIETAC), the United Nations Commission on International Trade Law (UNCITRAL), Inter-Pacific Bar Association (IPBA), and the All China Lawyers Association (ACLA), will be held on September 17, 2025, at China World Summit Wing, Beijing.

Being the flagship event of the China Arbitration Week, this Summit is themed “Navigating the Future of International Arbitration in the Digital Intelligence Era.” It will gather leading global experts in arbitration and legal practice, focusing on cutting-edge issues in international arbitration against the backdrop of digital and intelligent technologies (such as artificial intelligence) empowering the field. In-depth discussions will center on how to enhance arbitration efficiency, ensure procedural fairness, and uphold the public credibility of arbitration through technology-driven approaches. To further deepen legal exchanges and practical cooperation in the field of international commercial arbitration, the Summit will, alongside its main agenda, enhance arbitration-related dialogue and collaboration between China and Latin American countries. It aims to promote the development of a more open, fair, and sustainable international dispute resolution system and to jointly chart a new blueprint for global arbitration cooperation.

The Summit will be a one-day event, with simultaneous interpretation of Chinese and English. The Summit will take the form of a hybrid event with global livestreaming, providing a communication platform for participants from home and abroad.

We cordially invite representatives of international arbitration institutions, arbitrators, lawyers, general counsels, scholars, and other friends with interest to join us in this Summit and the series of events of the China Arbitration Week!

## Program

### Navigating the Future of International Arbitration in the Digital Intelligence Era

8:30-9:00

Registration

9:00-9:55

Opening Ceremony

9:55-10:10

Release of Achievements

10:10-10:30

Keynote Speech

10:30-12:30

Session I:

Smart Connectivity:  
Building Global Digital Intelligence  
Network for International Arbitration

The digital revolution and AI technologies are fundamentally transforming the international arbitration ecosystem, advocating for a new stage of collaboration. Given the legal, cultural, and technological diversity across jurisdictions, the arbitration community must build consensus and strengthen cooperation. By jointly advancing legislative reforms, rule-making, and improvements in arbitration procedures, we can achieve a balance between efficiency and fairness, thereby reinforcing the credibility of international arbitration. This session will gather representatives from international organizations and arbitration institutions to explore how to strengthen cooperation in the digital intelligence era.

12:30-13:45

Lunch

13:45-15:45

Session II:

Ethical Parameters:  
Redefining Boundaries for Digital Intelligence  
Assistance in International Arbitration

AI is driving international arbitration toward intelligent governance. While AI can optimize data management, improve evidence preparation, and assist in hearing procedures, it also poses challenges, including data security, algorithmic bias, and AI hallucinations, which may threaten fairness and confidentiality. This session will bring together experienced arbitrators, legal tech experts, lawyers, and scholars to explore ways to promote good intelligence through good governance in arbitration. Core issues will include AI-assisted practices, tech ethics, and rule development, aiming to guide the arbitration system toward sound governance in the age of AI.

## Tea Break

## Session III:

# Strategic Governance: Charting the Pathways of Industries in International Arbitration with Digital Intelligence

Technological evolutions are fueling industrial transformation, digitalization, and green transitions. How can international arbitration effectively serve the upgrading of traditional industries, the vigorous development of emerging industries, and the forward-looking layout of future industries? This session will convene business leaders, experts, and practitioners to discuss developments across key sectors, including healthcare, manufacturing, energy transition, electric vehicles, fintech, aerospace, cross-border e-commerce, and AI. The session will explore new challenges and requirements these key industries pose for arbitration, and how dispute resolution can better support a safe, stable, and cooperative global supply chain.
